

Index to Volume 58

The index to Volume 58 is composed of three parts: a subject index, an author index, and an advertising index.

The subject index is made up mainly of terms constructed by *International Pharmaceutical Abstracts*. The IPA index is an alphabetical, open-ended, controlled-vocabulary index that makes use of standardized headings. (The primary index terms for each article are listed routinely in *AJHP* as "index terms" after abstracts.) *IPA* covers all authored papers and editorials in *AJHP*, as well as selected letters and news reports. Items that were published in the ASHP Reports section, including official ASHP Statements and Guidelines, are indexed under "American Society of Health-System Pharmacists" as well as being covered by *IPA* in many cases. The subject index also notes all regular *AJHP* columns and, under the respective column headings, the titles of items in the following: Alternative Therapies, Book Reviews, Editorials, Frontline Pharmacist, Letters, Managed Care Forum, Management Consultation, News, Q&A, and CD-ROM Reviews. The subject index also contains, under the heading "Correction Notices," the title and issue of publication of items for which corrections were printed, as well as the page numbers on which the corrections appear.
